RHEUMATISM

AN INDESCRIBABLE TORTURE

Because Rheumatism sometimes comes on suddenly it doesn't prove that it is a chance disease or one due to accidental causes. It takes time for it to develop, and is at work in the system long before any symptoms are felt. The blood is the first point of attack, and the poisonous acids that cause the aches and pains are then distributed through the circulation to different parts of the system, and settle in joints, muscles and nerves; and when the system is in this condition it needs only some exciting cause like exposure to night air. damp, chilly weather, or the cold, bleak winds of winter, to arouse the slumbering poisons and bring on Rheumatism. The severity of the attack depends upon the amount of acid in the blood and the

quantity of acrid matter in the joints and muscles. Some peo- RHEUMATISM IN ELBOWS, WRISTS ple are almost helpless from the first, while others have occasional spells or are uncomfortable, restless, nervous and half sick all the time from the nagging aches and pains. Rheumatism is a disagreeable companion even in its mildest form. It grows worse as we grow older. and frequently stiffens the joints. draws the muscles out of shape and breaks down the nervous system. A disease that originates in the blood, as Rheumatism 408 Bloomfield Ave. does, cannot be cured with ex-

ternal remedies like liniments and plasters; such things scatter the pains or drive them to some other part of the body, but do not touch

the disease or improve the condition of the blood. The thin acid blood must be restored to its normal purity and strength, so that all poisonous substances may be carried out of the system, and no medicine accomplishes this in so short a time as S.S.S., which not only neutralizes the acids and counteracts the poisons, but builds up the general health at the same time. Write for our special book on Rheumatism, and should you

Urbana, Ohio, Aug. 25, 1903.

Last winter I had a severe attack of Rheumatism. It started in the right elbow, and from there to my wrists; the right wrist was the worse. It became swellen and extremely painful. My left kneg joint was the next place to be attacked. It became swellen and of course painful. The next point to be affected was the hip and ankle, which gave me much trouble. I was barely able to get about for some time. I was under treatment of a physician for awhile, but getting no better I began S. S. S., and after taking it for some time I was entirely relieved of the Rheumatism. All swelling and soreness disappeared. I consider S. S. S. an excellent remedy for Rheumatism and all troubles having their origin in the blood.
